## Join the Coordinate Dots!

Plot these coordinates and join them as you go. A picture will appear.

$$(3, 2) \rightarrow (4, 4) \rightarrow (9, 6) \rightarrow (4, 5) \rightarrow (2, 6) \rightarrow (1, 3) \rightarrow (-2, 4) \rightarrow (-5, 8) \rightarrow \rightarrow (-8, 14) \rightarrow (-8, 16) \rightarrow (-9, 14) \rightarrow (-10, 15) \rightarrow (-9, 12) \rightarrow (-11, 12) \rightarrow (-6, 0) \rightarrow \rightarrow (-2, 1) \rightarrow (-3, -1) \rightarrow (-9, -2) \rightarrow (-7, -4) \rightarrow (-8, -6) \rightarrow (-9, -7) \rightarrow (-11, -8) \rightarrow \rightarrow (-11, -9) \rightarrow (-9, -8) \rightarrow (-7, -5) \rightarrow (-6, -5) \rightarrow (-8, -8) \rightarrow (-10, -9) \rightarrow (-11, -10) \rightarrow \rightarrow (-9, -10) \rightarrow (-8, -9) \rightarrow (-6, -6) \rightarrow (-2, -7) \rightarrow (-2, -3) \rightarrow (2, 0) \rightarrow (2, -2) \rightarrow \rightarrow (11, -1) \rightarrow (13, 3) \rightarrow (12, 4) \rightarrow (11, 2) \rightarrow (10, 3) \rightarrow (10, 1) \rightarrow (3, 2).$$

You can finish the picture by adding a dot for the creature's eye. What are the coordinates of the eye?
